Mathematical Programming 63 (1994) 389
North-Holland

Author Index Volume 63

Ben-Tal, A., G. Eiger and V. Gershovitz, Global minimization by reducing the duality gap (2) 193–212
Bertsimas, D. and J.B. Orlin, A technique for speeding up the solution of the Lagrangean dual (1) 23– 45
Bodin, F. *see* C. Eisenbeis (3) 331–370
Burton, D. and Ph.L. Toint, On the use of an inverse shortest paths algorithm for recovering linearly correlated costs (1) 1– 22
Byrd, R.H., J. Nocedal and R.B. Schnabel, Representations of quasi-Newton matrices and their use in limited memory methods (2) 129–156
Cho, J.D. and M. Sarrafzadeh, The pin redistribution problem in multi-chip modules (3) 297–330
Eiger, G. *see* A. Ben-Tal (2) 193–212
Eisenbeis, C., W. Jalby, D. Windheiser and F. Bodin, A strategy for array management in local memory (3) 331–370
Frenk, J.B.G., J. Gromicho and S. Zhang, A deep cut ellipsoid algorithm for convex programming: Theory and applications (1) 83–108
Gal, S., Y. Hollander and A. Itai, Optimal mapping in direct mapped cache environments (3) 371–387
Gershovitz, V. *see* A. Ben-Tal (2) 193–212
Glover, B.M., V. Jeyakumar and W. Oettli, A Farkas lemma for difference sublinear systems and quasidifferentiable programming (1) 109–125
Goemans, M.X., The Steiner tree polytope and related polyhedra (2) 157–182
Gromicho, J. *see* J.B.G. Frenk (1) 83–108
Hollander, Y. *see* S. Gal (3) 371–387
Ihler, E., The rectilinear class Steiner tree problem for intervals on two parallel lines (3) 281–296
Itai, A. *see* S. Gal (3) 371–387
Jalby, W. *see* C. Eisenbeis (3) 331–370
Jeyakumar, V. *see* B.M. Glover (1) 109–125
Jünger, M., A. Martin, G. Reinelt and R. Weismantel, Quadratic 0/1 optimization and a decomposition approach for the placement of electronic circuits (3) 257–279
Kremers, H. and D. Talman, A new pivoting algorithm for the linear complementarity problem allowing for an arbitrary starting point (2) 235–252
Liebling, Th.M. *see* F. Margot (2) 183–191
Margot, F., A. Prodon and Th.M. Liebling, Tree polytope on 2-trees (2) 183–191
Martin, A. *see* M. Jünger (3) 257–279
Nocedal, J. *see* R.H. Byrd (2) 129–156
Nozawa, R., Examples of max-flow and min-cut problems with duality gaps in continuous networks (2) 213–234
Oettli, W. *see* B.M. Glover (1) 109–125
Orlin, J.B. *see* D. Bertsimas (1) 23– 45
Prodon, A. *see* F. Margot (2) 183–191
Reinelt, G. *see* M. Jünger (3) 257–279
Sarrafzadeh, M. *see* J.D. Cho (3) 297–330
Schnabel, R.B. *see* R.H. Byrd (2) 129–156
Scott Provan, J., Efficient enumeration of the vertices of polyhedra associated with network LP's (1) 47– 64
Talman, D. *see* H. Kremers (2) 235–252
Toint, Ph.L. *see* D. Burton (1) 1– 22
Weismantel, R. *see* M. Jünger (3) 257–279
Windheiser, D. *see* C. Eisenbeis (3) 331–370
Zhang, S. *see* J.B.G. Frenk (1) 83–108
